

SCORPION 2008 HOMECOMING

1970 STINGER

Be on top!

With Scorpion Stinger - the snowmobile that climbs steep slopes like a mechanized mountain goat!

Speed and power - yes. But Scorpion Stinger has something else. Climbing ability. Proved at Whistler Mountain in British Columbia. Ask the 12 manufacturers and the national magazine (name on request) representatives who were there last spring! Only one snowmobile could climb the really steep slopes! Scorpion Stinger - the semi-racing model with lightweight polyurethane track, special new suspension system, and engine options to 800cc's. If your snowmobiling includes climbing the steep slopes - test drive the snowmobile that knows how.

Come ride Scorpion '70
The proven snowmobile that never let's you down.

SHOVE OFF TO ADVENTURE

Wake up and live on Scorpion Stinger! Available in semi-racing models or custom modified at the factory for the rugged demands of competition! This new goer of the snowmobile world features engine options up to 800cc's! ... lightweight polyurethane track! ... beautiful, gleaming new iridescent hood that makes you a standout in any crowd!
